

Hello my friends,

We have come from the island of Cyprus where everybody can swim for eight months of the year. It's nice to see some of you again and nice to meet all of you.

I think that after our three meetings and shared experiences in this Erasmus programme, «Green life», we are all connected to each other a lot. This joy of connection was given to us by Mr Don Pentro and the school of Karvina from the Czech Republic. The Czech Republic holds the presidency of the Council of the European Union now and in a way, so does Karvina and Mr Don Pentro. We still remember your hospitality and the memorable times we spent together.

Lithuania, one green, environmentally friendly and hospitable country, with lakes and forests that look like a painting, is the personalization of this Erasmus programme. We express our appreciation to Nastasia with her beautiful, broad smile.

Dear friends from beautiful Romania, the Balkan gem, with the impressive castles.

Dear friends from Spain, the land of conquistadors and the Spanish art of flamenco but also the country with the most Unesco World Heritage sites in Europe.

Last but not least, dear friends from Portugal with the amiable people and the homeland of River Tagos and the famous explorer Vasco Da Gama.

This Erasmus programme is a unique programme with many activities, something fundamental for our beautiful but at the same time suffering planet, due to our mistakes. One of our mistakes is the war which has begun in the civilized Europe after 45 years. We hope that it will finish shortly. Now, we believe all of us together can save our planet as long as we realize we can do it. We don't any other choice.

We thank you all once again and especially the Lithuanian team.

«Labas rytas», «Sveiki»
